High quality Printing on a Variety of Media

Tubes
Direct printing on commercially available round tubes (inner diameter: 2.5 to 6.5 mm*) is possible. High-quality clear and crisp printing ensures high management efficiency.
* The Mk1100 is compatible with 2.5 mm to 5.2 mm diameter cables.

Label tapes
Characters can be printed on the labels to be affixed to the devices at distribution boxes. Characters can be printed from a minimum of 1.3 mm font size*, which is extremely useful for various applications at work sites.
* Mk2100 only

Wrap Around Tape
Transparent laminate covers the printed surface – no need to worry about friction wearing away letters. Width:8-150mm. Length of printed text can vary according to different use.
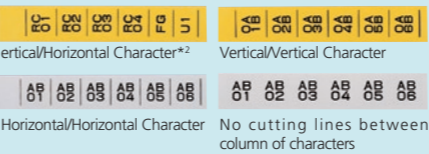

Heat shrink tubes
Heat shrink tubes are available in different shrinkage ratio, 1/2 and 1/3. Tubes available in yellow and white.
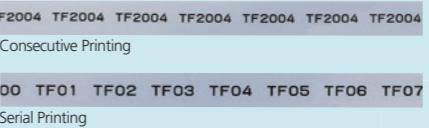

Various Print Patterns
You can use various print features such as framing, 3 lines/segment printing*[1], selective character orientation, and underlining in addition to selective character size and pitch.

ertical/Horizontal Character*[2]   Vertical/Vertical Character

Horizontal/Horizontal Character   No cutting lines between column of characters

*1 Only the Mk2100 allows 3 lines/segment printing of 1.3 mm (full-width) alphanumeric characters.
*2 Only Mk2100 allows Vertical/Horizontal Character printing.

Consecutive/Serial Printing
Mk Series printers can be set to print the same text on every segment (consecutive printing). Just enter the data and the number of segments required, then start the print. Or, Mk Series printer can be set to print numbers that increment automatically as the segments print (serial printing). No need to do separate entries and printing for each segment!

Automatic Cutting/Full-cut is also possible
Each segment is partially cut automatically as it prints. The segments are easily separated manually after they come out of the printer. The cutting operation for each job can be set for full-cut, half-cut, no cut with marking, or no cut without marking.
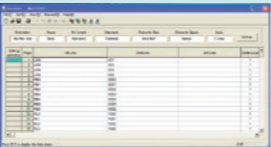

Half cuts can be manually separated easily.

The printer can be linked with PC through USB interface PC Connection Kit
Data can be sent from the PC to the printer, allowing you to create large quantities of data with ease. In addition to the existing original files, the printer can read CSV-format files. This feature greatly reduces the time required for field work.
* Mk2100 only

Portable Hard Case Allowing You to Print without Uncasing the Printer
A dedicated hard case is available for handy carrying to the work site. It is made of aluminum and has superior impact resistance for use at poor footholds. In addition, you can print characters without taking the printer out of the case, ensuring smooth work.
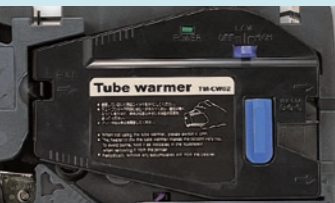

Clear Printing at Low Temperatures Tube Warmer
The tube warmer warms cold tubes before printing, ensuring clear printing in an extremely cold environment or in a cold room.
* Printing under low temperature down to 5°C is guaranteed.

Smooth Feeding of Tube Tube Feeder
The tube feeder steadily feeds a tube to the printer from the reel so that the tube does not get tangled.
* Mk2100 only

Useful display to support your needs
The printer can display the type and amount of ribbon remaining in the ribbon cassette.

Printing Up to Trailing Edge of Tube
The Mk Series printers can print characters up to the edge of each tube to avoid tube waste. This contributes to long-term cost reduction.
